Cygwin - X11 Manager for Windows

<https://www.cygwin.com/>

Fehlermeldung wegen Python3 Inkompatibilität:

```
File "/usr/bin/terminator", line 119 except (KeyError,ValueError), ex:
```

Lösung:

Quelle: <https://askubuntu.com/a/1209775>

```
sudo sed '1s!/usr/bin/python!/usr/bin/python2.' /usr/bin/terminator
```

Visual Code

Problem mit bash Skripten und Zeilenumbruch mit Windows typischen "\r"

Lösung:

Edit: Jan 3, 2022. As `VSCode` is mentioned several times. Go to settings in VSCode and type `files.eol` in the search field and set to `\n` (Unix format). Note that this changes this for your user or workspace for all files and it may not be what you want. YMMV.
